

MD ASHAB HOSSAIN

SUMMARY

Analytical engineer focused on industrial automation, energy systems, and efficiency improvements. Skilled in HVAC planning, performance analysis, and troubleshooting to support reliable, efficient operations.

PROJECT WORKS

Data Acquisition System for Study & Calibration of Thermocouple

- Automated the entire experiment of calibration of thermocouple by muffle furnace. Used image processing system to retrieve data from muffle furnace screen.

Controlling Temperature And Humidity of a Micro-Environment Using a Tec System

- Successfully demonstrated a functional system capable of managing varying temperatures efficiently using a Peltier-based setup. It has proven effective in maintaining a controlled environment, crucial for applications such as incubation or precision thermal management.

RESEARCH WORKS

Capability-Aware Autonomous Navigation for Torque-Adaptive Mobile Robots

- A mobile robot been built from scratch; which have intelligent features like traversability prediction system and torque adaptiveness upon different situation.
- Robot can intelligently apply enough torque to just overcome the object; and it can detect if a object is traversable or not.
- Proven successful in field and simulator test crossing similar navigation frameworks.

EDUCATION

BUET

Bsc in Mechanical Engineering
CGPA: 3.24 / 4.0

Birshreshtha Noor Mohammad Public College

Science | HSC 2020 | Result: GPA 5.00
Science | SSC 2018 | Result: GPA 5.00

WORK EXPERIENCE

Synovia Pharmaceuticals PLC

MAR 2025 - APR 2025

Industrial Trainee

- Collaborated with 5+ cross-functional teams (engineering, QA, procurement, utilities, IT) on optimizations in water treatment, energy, and production efficiency.
- Studied procurement & inventory in Oracle ERP across 5000+ SKUs; flagged opportunities for data-driven forecasting and supply chain optimization.
- Evaluated HVAC & cleanroom data (temperature, humidity, particle count) across 20+ zones; tuned parameters to maintain >98% GMP compliance and cut deviation incidents by 15%.

Udvash

2023 - 2025

Physics Instructor

- Tutored and Managed over 5000 HSC Level Student.
- Prepared Material Content for the Udvash Parallel Text.

CONTACT

+8801318856238

SKILLS

- Programming & Scripting: Python, MATLAB, C, C++, Generative AI
- Data Analysis And ML: Matplotlib, Excel, Google Sheets
- Simulation and Analysis: SolidWorks, AutoCAD
- Graphics: Adobe Premiere Pro, Blender, Canva
